I am writing to urge the FCC to REJECT NAB's petition 04-160! I am an XM Satellite listener, and, quite frankly, it is the best thing that has happened to me as far as radio listening. All of it's programming provides choices, and in my opinion, that is what the First Amendment is all about. I use the Instant weather and traffic feature when travelling, and have found it to be invaluable. I am paying a monthly fee for this service because of the high quality of programming XM Satellite Radio provides! XM should have the right to broadcast what its listeners want, and are willing to pay for. I ask that careful consideration be given to this petition, then have it rejected.

Sincerely,  
William L. Marinucci
